

Alexandr Chumak

Senior Frontend Engineer → AI Product Engineer

ciumac.dev@gmail.com · linkedin.com/in/spumony · Chişinău, Moldova (UTC+2)

SUMMARY

Senior Frontend Engineer with 5 years shipping production React, TypeScript and Next.js. Now extending into AI product engineering: learning the application layer (Vercel AI SDK, RAG on pgvector, streaming UIs and evals) by building a real full-stack app. Open to senior frontend / AI Product Engineer roles across the EU and to long-term 10–20 hr/week retainers.

EXPERIENCE

Lead Frontend Developer

2026 – Present

Multisoft, Romania (Remote)

- Sole frontend developer on a restaurant CRM platform, owning architecture, UI and feature delivery.
- Building the client app from scratch in Next.js and TypeScript: architecture, component system and routing.
- Shipping order, menu and reporting modules with data-heavy tables, filtering and complex forms.
- Setting the design system and frontend standards, keeping the UI fast and consistent.

Frontend Developer

2021 – Dec 2025

TeamArt — EVCARGO (Remote)

- Built the frontend of a production e-mobility logistics platform within a cross-functional Scrum team.
- Built and maintained a shared design system and reusable component library.
- Designed scalable client-side architecture and integrated REST APIs with React Query.
- Drove code reviews and technical planning, from requirements to release.

Web Developer

2019 – 2020

Freelance (Remote)

- Delivered and modernised web apps for clients end to end; refactored legacy interfaces and improved performance and UX.

Web Designer

2018 – 2019

Exterior Security Systems, Chişinău, Moldova

- Created visual concepts and digital assets for web and marketing.

PROJECTS

Learning Platform / Bookmark Manager

2026 – in progress

Next.js 16, TypeScript, PostgreSQL, Drizzle ORM, Inngest, Zod

- From-scratch full-stack app for AI-engineering practice: session auth (bcrypt, httpOnly cookies), protected REST API with ownership-based authorization.
- Bookmark manager with background OG-tag scraping via Inngest, pagination and search; schema migrations baseline via Drizzle.
- Next: RAG search on pgvector and an evals harness for LLM features.

SKILLS

Frontend: React, TypeScript, Next.js (App Router), Tailwind CSS, TanStack Query, Zod, Vitest, Playwright, A11y (WCAG 2.2)

Fullstack: Node.js, PostgreSQL, Drizzle ORM, Server Components / Actions, Session auth (bcrypt), REST API design, Inngest, Sentry, Vercel

AI engineering (learning): Vercel AI SDK, OpenAI / Anthropic / Gemini SDK, Embeddings + pgvector, RAG, Evals, Observability, Streaming UX (SSE), Prompt versioning, LLM agents / MCP

Practice: Design systems, A/B testing, Product metrics, Cross-functional collaboration, Mentoring, Async written communication, Product / UI design (Figma)

EDUCATION

Master’s in Information Technology	2018 – 2020
Technical University of Moldova	
Bachelor’s in Information Technology	2015 – 2018
Technical University of Moldova
