SUMMARY

Senior Frontend Engineer with 6+ years building production web and mobile products in React, TypeScript, Next.js and React Native. From 2021 to 2026 at TeamArt: five years on EVCARGO's logistics and transport CRM, building and maintaining the design system and the client-side data architecture, then the only frontend engineer on a restaurant CRM. Also builds and ships products end to end: Rivella, a multi-tenant AI booking assistant, is deployed and running in production, and Prosvetum, an iOS book-summary app, is published on the App Store. Available immediately.

EXPERIENCE

Frontend Developer Jan 2026 – Aug 2026
TeamArt — Multisoft · Remote

- Restaurant CRM for a Romanian HoReCa software vendor: the only frontend engineer on the project, building interfaces for administrators, kitchen staff and waiters.
- Built the Next.js/TypeScript client from scratch, and designed and documented the component system, routing structure and frontend conventions.
- Implemented dense tables, filtering, validation and long forms over REST APIs on one shared component set.

Frontend Developer Feb 2021 – Dec 2025
TeamArt — EVCARGO · Remote

- Five years on a logistics and transport CRM for a UK logistics operator, web and mobile, delivering features end to end inside a cross-functional Scrum team.
- Built and maintained the shared design system and component library, then structured the client-side architecture around consistent UI and data patterns.
- Designed REST data flows with React Query and Axios, covering auth refresh, caching, pagination, filtering, invalidation and error handling.
- Contributed to the React Native app and cross-platform releases, including Android SDK upgrades and iOS release validation.
- Introduced Playwright coverage for critical user flows.
- Ran frontend code review and contributed to estimation, technical planning and release coordination.

Web Developer Aug 2019 – Dec 2020
Freelance · Remote

- Built and modernised client web applications in JavaScript and React, including legacy UI refactoring and end-to-end feature delivery.

Web Designer — Exterior Security Systems, Chișinău Oct 2018 – Mar 2019

SELECTED PROJECTS

Rivella — multi-tenant AI booking assistant rivella.app
Next.js · TypeScript · NestJS · Prisma · PostgreSQL 16 · Docker · GitHub Actions · Telegram Bot API · YClients API

- Built and deployed the product solo: a Next.js/TypeScript admin panel over a NestJS/Prisma API on PostgreSQL 16, shipped as Docker images built in GitHub Actions and running in production on a VPS.
- Built the admin frontend — dashboard, analytics, conversations, CRM, bookings, subscriptions and knowledge base — bilingual in Russian and English.
- Designed a tenant-scoped data model with non-null tenant keys across all 12 tenant-scoped tables, and integrated Telegram and YClients so the assistant reads availability and creates appointments behind a manager confirmation step.

Prosvetum — book-summary iOS app with an AI mentor App Store

React Native (Expo) · TypeScript · NativeWind · Supabase · pgvector · Sentry · EAS

- Built solo and published on the App Store in September 2026: book summaries with audio, quizzes, flashcards and an AI mentor.
- Supabase backend on PostgreSQL with row-level security and Edge Functions for chat, recommendations and audio delivery; mentor answers grounded in vector search over Voyage embeddings in pgvector.
- TanStack Query cache persisted to AsyncStorage; error monitoring in Sentry; builds and App Store submission through EAS.

SKILLS

Frontend: React, TypeScript, JavaScript, Next.js (App Router), React Native, Expo, HTML, CSS, Tailwind CSS, TanStack Query, Zod

Frontend architecture: Design systems, component libraries, client/server state, REST integration, auth flows, accessibility

Quality: Playwright, Jest, code review, CI/CD (GitHub Actions), EAS, Sentry

Backend & data: Node.js, NestJS, PostgreSQL, Prisma, Supabase, pgvector, PostgreSQL full-text search, Docker, multi-tenancy, REST API design

Applied AI: Tool-calling agents, agent loop design, LLM integrations, prompt design, Anthropic / OpenAI SDKs, AI product UX

EDUCATION

M.Sc. Information Technology — Technical University of Moldova 2018 – 2020

B.Sc. Information Technology — Technical University of Moldova 2015 – 2018
